

1. FINALIZE GEOGRAPHIC MODEL FOR TESTING:
  - HPSAS
  - MUAS
  
2. ANALYTICAL RESULTS/FINAL DECISIONS ON FACTORS
  - TESTING ISSUES
    - Factor analysis
    - Regression analysis
      - Geographic side
    - Etc.
  - BARRIERS (Sherry Workgroup)
    - Race ethnicity
    - Rural/frontier/pop density
    - Linguistically isolated/limited English proficiency
    - Transportation barriers/ travel time
      - Race
      - LEP/Hispanic-Latino – chose one
      - Rural/Frontier factor
      - Disability/Direct measures of access
      - Ambulatory Case Sensitive Conditions/Direct measures of access
  - SDI/HEALTH STATUS
    - Standardized mortality ratio
    - Infant mortality/low birth weight
    - Diabetes/chronic disease prevalence
    - 100% poverty
    - Less than high school education
    - % single family households
    - % not employed/unemployed
  - P2P
    - Which providers
    - Estimating need/demand; age, gender adjustments
  - ABILITY TO PAY (Steve Workgroup)
    - % uninsured
    - % below 200% poverty level
    - Steve's proposal
  - OTHER INDICATORS OF UNDERSERVICE
    - Preventable hospitalizations/ambulatory care sensitive conditions
    - % usual source of care
    - Disability/limits to daily living
  
  - COMBINING ELEMENTS, WEIGHTS Tess's chart? (Alice R work group)
  
3. POPULATION GROUP OPTIONS (Beth workgroup)
  - subpop streamlined proposal
  - pop group HPSA/MUA approaches
  - possible pop group testing options

4. FACILITY PROPOSAL (Kathleen Facility workgroup)
  - Safety net facility
  - Magnet facility
  
5. RATIONAL SERVICE AREAS (Steve workgroup proposal)
