SMART Vaccines 2.0: Stakeholders Meeting

• **SMART Vaccines 2.0**: A vaccine prioritization software tool developed to support prioritization and decision-making related to vaccine research, development, and deployment

• NVPO and Fogarty International Center have been working in collaboration to further develop and implement this tool originally designed in collaboration with the Institute of Medicine

• Fogarty and NVPO are sponsoring a stakeholders meeting June 29 and 30 to obtain feedback on recent developments and direction for further optimization of the tool
Immunization Safety Task Force Activities

• NVPO coordinates and leads the Immunization Safety Task Force (ISTF). The Taskforce ensures that all federal efforts relevant to immunization safety are coordinated and integrated and that opportunities to enhance synergies across the federal government in immunization safety are identified.

• The task force met recently to discuss two important topics:
  • Protection and Immunological Behavior of Chimeric Yellow Fever Dengue Vaccine
  • Surveillance of Guillain-Barre Syndrome in the U.S. in relationship to the Zika virus epidemic
NVPO Vaccine Safety Publication Submission

Unique Safety Issues Associated with Virus Vectored Vaccines: Potential for and Theoretical Consequences of Recombination with Wild Type Virus Strains
