Publications

As a means of sharing knowledge, HHS encourages recipients to arrange for publication of the results and accomplishments of HHS-supported activities. HRSA prior approval is not required for publishing the results of an activity under a grant. Recipients also may assert copyright in scientific and technical articles based on data produced under the grant and transfer it to the publisher or others where necessary to effect journal publication or inclusion in proceedings associated with professional activities. Any such transfer is subject to the royalty-free, non-exclusive and irrevocable license to the Federal government and any agreement should note explicitly that the assignment is subject to the government license.

Journal or other copyright practices are acceptable unless the copyright policy prevents the recipient from making copies for its own use (as provided in 45 CFR 74.36 and 92.34). The recipient should account for royalties and other income earned from a copyrighted work as specified by HRSA (see Part IV and the Notice of Award).

For each publication that results from HHS grant-supported activities, recipients must include an acknowledgment of grant support using one of the following statements:

"This publication was made possible by Grant Number _____ from the Health Resources and Services Administration (HRSA), an operating division of the U.S. Department of Health and Human Services."

"The project described was supported by Grant Number _____ from the Health Resources and Services Administration (HRSA), an operating division of the U.S. Department of Health and Human Services."

Recipients also must include a disclaimer stating the following:

"Its contents are solely the responsibility of the authors and do not necessarily represent the official views of the Health Resources and Services Administration or the U.S. Department of Health and Human Services."

If the recipient plans to issue a press release concerning the outcome of HHS grant-supported activities, it should notify the HRSA project officer in advance to allow for coordination. One copy of each publication resulting from work performed under an HHS grant-supported project must accompany the annual or final progress report submitted to HRSA.
