COURSE DESCRIPTION

This course combines classroom instruction and hands-on techniques to teach participants a comprehensive approach to manage the insensitive foot.

UPON COMPLETION, THE PARTICIPANT SHOULD:

- *understand the features of diabetic neuropathy;*
- *perform a diabetes foot screen, assign risk category, and formulate an appropriate treatment plan;*
- *understand the rationale and benefits of a basic prevention program;*
- *understand the treatment principles for diabetic foot lesions;*
- *understand the etiology of foot ulcerations;*
- *identify charcot foot deformities and describe their role in ulcerations;*
- *identify the four mechanisms by which patients develop plantar ulcers;*
- *identify bony deformities and biomechanical faults which place the patient at high risk;*
- *apply a cast or splint used for the treatment of foot ulcerations;*
- *describe orthotic and footwear appliances used to reduce foot pressure;*
- *correctly measure shoe fit in the high risk individual.*

WHO SHOULD ATTEND?

- ❖Nurses
- ❖Physical Therapists
- ❖Podiatrists
- ❖Orthotists
- ❖Pedorthists
- ❖Diabetic Educators

CELLY LAWRENCE, C.PED.

NATIONAL HANSEN'S DISEASE PROGRAMS

The NHDP is located in southeast Baton Rouge approximately 75 miles from New Orleans. The NHDP is located near antebellum homes, swamp tours and historic river road towns.

The NHDP is a center of excellence providing comprehensive patient care for HD on site at Ochsner Hospital in Baton Rouge. Limited medical services are also available through 12 ambulatory HD clinics and select private physicians around the country.

The NHDP is also a renowned leader in Hansen's disease research through the Laboratory Research Branch at Louisiana State University School of Veterinary Medicine.
