

Dear Manufacturer,

The Health Resources and Services Administration (HRSA) is developing a system to verify the accuracy of manufacturer-calculated 340B selling prices against HRSA's calculated 340B ceiling prices, in accordance with Section 340B(d)(1)(B)(i)(II) of the Public Health Service Act. As part of this process and to enhance program integrity, we are requesting that you verify the accuracy and completeness of the information on file for your organization in the [340B program database](#) by May 15, 2015. It is important that manufacturers ensure they have the most up to date information on the database.

Please review the database record for each of your labeler codes and submit a [manufacturer change request form](#) to 340Bpricing@hrsa.gov if any updates are necessary. Making any necessary corrections today will promote the security and integrity of your sensitive pricing data, as well as facilitate the rollout of the system later this year. Thank you for your continued support of the 340B Program.

Sincerely,

Krista M. Pedley, PharmD, MS
CDR, USPHS
Director, Office of Pharmacy Affairs
