HRSA PROGRAMS

HRSA programs help those in need of high quality primary health care, people with HIV/AIDS, pregnant women, and mothers. HRSA also supports the training of health professionals, the distribution of providers to areas where they are needed most and improvements in health care delivery.

In addition, HRSA oversees organ, bone marrow, and cord blood donation. It compensates individuals harmed by vaccination, and maintains databases that flag providers with a record of health care malpractice, waste, fraud, and abuse for federal, state, and local use.

Nearly 90% of HRSA's budget is awarded through grants and cooperative agreements to approximately 3,000 awardees, including community-based organizations, colleges and universities, hospitals, state, local, and tribal governments, and private entities.

PROGRAM HIGHLIGHTS

- More than 28 million people nationwide receive primary medical, dental, and/or behavioral health care from a HRSA-funded health center.
- More than half a million people with diagnosed HIV in the United States receive services through the Ryan White HIV/AIDS Program.
- More than 14,900 clinicians from the National Health Service Corps and Nurse Corps provide primary care services, including medical, dental, and mental health.
- HRSA workforce grants helped prepare more than 400,000 health profession trainees for practicing in primary care, rural, or underserved settings.
- An estimated 55 million individuals, including pregnant women, infants, children, including children with special health care needs, and their families in the United States benefited from a Title V service. This includes 91% of all pregnant women, 99% of infants, and 54% of children nationwide.
- Nearly 3.2 million miles in travel for care saved as patients were served by HRSA-supported telehealth networks.
- About 150,000 parents and children participate in the Maternal, Infant, and Early Childhood Home Visiting Program.
- More than 36,500 organ transplants were performed in the United States, a new all-time high.
- More than 6,100 bone marrow and cord blood transplants were performed.
- Of approximately 2.1 million human exposure calls to Poison Control Centers, 66% were treated at the site of exposure.
- Approximately 87% of Ryan White HIV/AIDS Program clients are virally suppressed, up from 70% in 2010, and exceeding the most recent national average of 63%.

BUREAUS & OFFICE

HRSA's management and oversight of programs is organized through the following bureaus and office:

- Bureau of Health Workforce
- Healthcare Systems Bureau
- Bureau of Primary Health Care
- HIV/AIDS Bureau
- Federal Office of Rural Health
- Maternal and Child Health Bureau

Updated March 2020
Ryan White HIV/AIDS
$2.4 billion to support cities, states, and local community-based organizations to provide care and treatment, medication, and support services to people living with HIV.

Maternal & Child Health
$1.3 billion to improve the health of all mothers, children and their families.

Rural Health Policy
$318 million to promote better health care service in rural America.

Healthcare Systems
$134 million to provide oversight to the national: 1) organ and tissue donation and transplantation systems; 2) poison control centers; 3) Hansen’s disease program; 4) drug discount program; and, 5) injury compensation programs.

Primary Health Care
$5.6 billion for affordable, accessible, quality, and cost-effective primary health care services.

Health Workforce
$1.6 billion to educate, train, and connect health care professionals to communities in need.

Family Planning*
$286 million to expand family planning services to individuals in need by improving access to family planning centers and preventive services.

Program Management
$155 million to support HRSA’s program oversight and operations.

* Administered by the HHS Office of the Assistant Secretary for Health, Office of Population Affairs.
