

# The HRSA Strategy to Address Intimate Partner Violence

**Intimate Partner Violence (IPV) is an important public health issue.** Approximately **1 in 4 women and 1 in 7 men** have experienced severe physical violence by an intimate partner at some point in their lifetimes.\*

**The Strategy is HRSA's framework to address IPV through 2020.**

HRSA's Office of Women's Health leads the **implementation** of this novel initiative.

**1st agency-wide strategy**, of its kind to take a **collaborative** approach to addressing IPV.

## Strategy Components

4 Priorities,

Train  
Workforce

Develop  
Partnerships

Increase  
Access

Impact  
Knowledge

**10 Strategic Objectives** and **27 Activities** implemented over **3 years** to maximize HRSA's broad reach across **90+ public health programs** and **3,000+ grant recipients** to impact **25 intended outcomes**

## Activity Highlights: 2017-2018

**8,566** page views of the IPV Health Partners Toolkit

**74%** of HRSA's home visiting program participants Screened for IPV in FY17

**5,803** page views of the IPV web page on the Center for Integrated Health Solutions

**5** states participating in Project Catalyst to implement a new leadership model

Delegates from **18** countries received IPV training and resources
