

# Follow-up and Treatment Workgroup Progress Report

ACHDNC Meeting, November 10, 2018

Jeffrey P. Brosco MD PhD

Mailman Center for Child Development, University of Miami

Florida Department of Health

# FUTR Workgroup Members

Jeffrey P. Brosco, MD, PhD - Workgroup Chair · Christopher A. Kus, MD, MPH - Workgroup Co-Chair

## ACHDNC Members

Susan A. Berry, MD

Kamila B. Mistry, PhD, MPH

Annamarie Saarinen

## Organization Representatives

**Carol Greene, MD**

Robert J. Ostrander, MD

Debra Freedenberg, Md, Phd

## Workgroup Members

**Sabra Anckner, RN, BSN**

Amy Brower, PhD

Christine Brown, MS

Nancy Doan Leslie, MD

Kathryn Hassell, MD

Sylvia Mann, MS, CGC

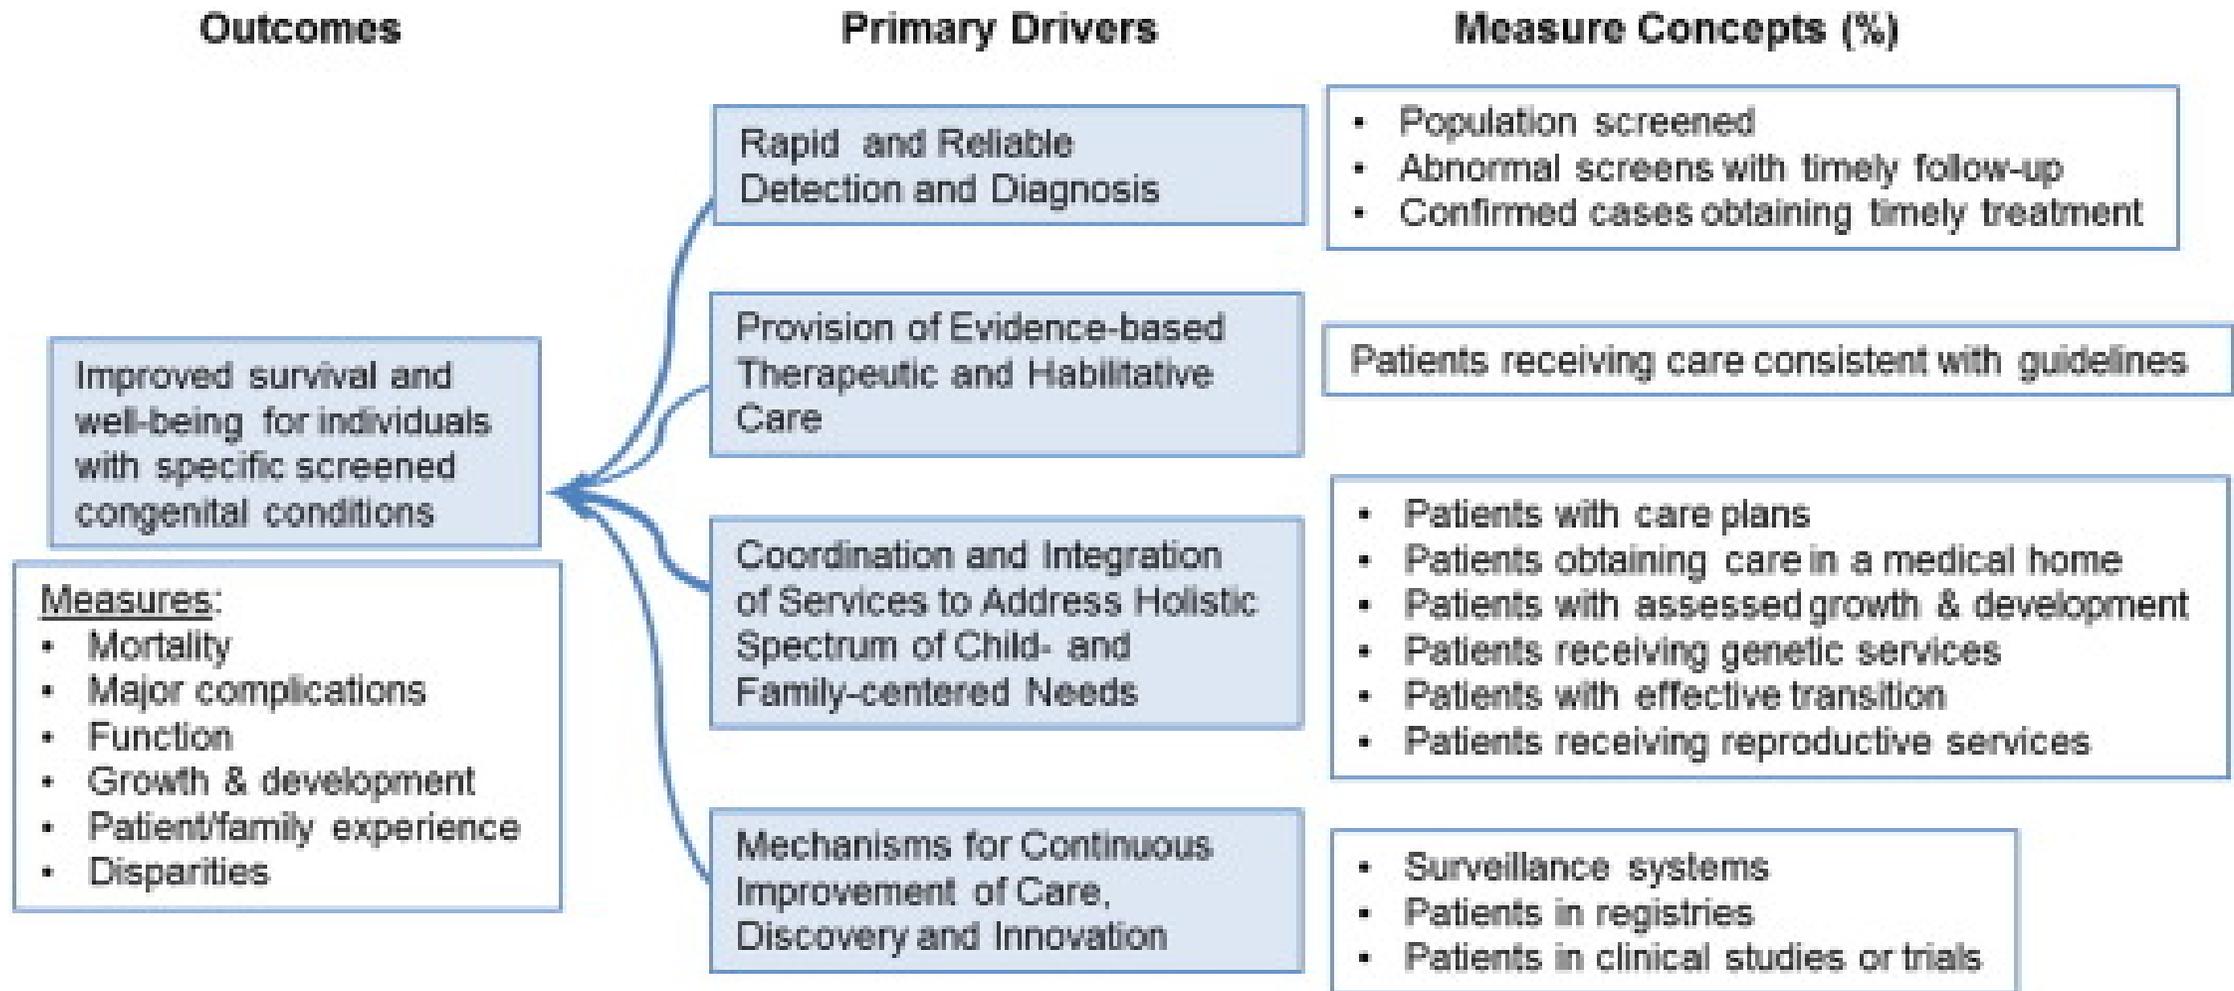

**Dawn S. Peck, MS, CGC**

Margie A. Ream, MD, PhD

Joseph H. Schneider, MD, MBA, FAAP

Janet Thomas, MD

# Vision for (Long-Term) Follow-Up and Treatment

# Workgroup Activities

1. Quality Measures
  - Report complete and will be posted
  - Dissemination plans on-going (Alan Zuckerman)
2. Medical Foods for Inborn Errors of Metabolism
  - Report complete (final edits)
  - Plans for publication in abbreviated format (Sue Berry)
3. Environmental scan - Kemper and Lam et al
  - Who is doing what, using which tools
4. Create a “Roadmap” to a practical system of NBS LTFU
  - “L” = “long-term,” “longitudinal,” “lifespan”

# Workgroup Activity: Roadmap

## 1. Intended Purpose

- Provide NBS stakeholders with a roadmap to achieving a “federated system” for long-term/longitudinal/lifespan follow-up

## 2. Need, gap, or barrier/challenge the activity is addressing

- There are many LTFU activities; there are also many gaps
- There is no “system” connecting various activities into a coherent LTFU

## 3. Type of Activity and/or Intended Final Product

- Work with stakeholders to develop a report (“roadmap”) with specific roles
- Consider interim steps (e.g. explore how to support patient registries)

## 4. Estimated Timeline

- December 2018

# Follow-up and Treatment Workgroup

## PHSI Feedback

ACHDNC Meeting, November 10, 2018

Jeffrey P. Brosco MD PhD

Mailman Center for Child Development, University of Miami

Florida Department of Health

# Public Health System Impact Assessment

- Who is answering the survey?
  - NBS program/lab - good people who don't want to say "no" to babies
    - Is there a way to distinguish later vs. early adopters?
  - Include state advisory board, public health leadership
- "Time" seems less useful tool because of legislation
  - E.g. question 5 re funding (<1, 1-3, >3 years to resolve funding challenge)
  - Mandates/timetables re RUSP
  - If something is politically important, then time contracts
  - Answers represent a snapshot in time
- Follow-up and treatment Items are on the survey but somehow not fully appreciated
  - Consider separating the survey sections into lab and non-lab issues
  - (Don't forget "point of care")

# Public Health System Impact

- Different audiences and purposes?
  - Primary purpose is to help inform ACHDNC decision
  - Also can be helpful for stakeholders to understand how easy/hard it is to implement a new condition in a state's NBS system
- Public health system impact – “big” question?
  - Maybe answers to specific items now on the survey less important than the exercise of trying to imagine what might make it difficult to implement a new condition
  - Given your state's experience with adding new conditions, how hard will it be to add condition x NBS?
    1. Technically hard/easy to screen (“flip a switch” vs. entirely new process)
    2. How many infant will need follow-up? (prevalence, FPs, indeterminate)
    3. Clinical resources for treatment (specialists, funding)
    4. Is it a public health priority? What are the opportunity costs? (public health crises, fits into broader strategic planning)

# Public Health **System** Impact

- Why the “big” question is hard to answer . . .
- The “practical” issues of adding a condition to the state NBS system (testing procedure, follow-up, clinical resources, public health priority) will always need to be interpreted in the context of
  - Resources available
  - Political environment
  - Etc.
