Office of Infectious Disease and HIV/AIDS Policy Update

Advisory Commission on Childhood Vaccines:
September 2019
National Vaccine Plan

- On behalf of the Assistant Secretary for Health, the National Vaccine Program Office (NVPO) coordinates national immunization activities.
- NVPO oversees the National Vaccine Plan (NVP)—the nation’s roadmap for a 21st century vaccine and immunization enterprise. The current goals include:

  **Goal 1:** Develop new and improved vaccines

  **Goal 2:** Enhance the vaccine safety system

  **Goal 3:** Support communications to enhance informed vaccine decision-making

  **Goal 4:** Ensure a stable supply of, access to, and better use of recommended vaccines in the United States

  **Goal 5:** Increase global prevention of death and disease through safe and effective vaccination

Recognizing the importance of adult immunization and the lack of sufficient progress in increasing rates, NVPO worked with partners to develop the first ever National Adult Immunization Plan (NAIP) in 2016.

The NAIP outlines four goals for advancing U.S. adult immunization efforts:

1. **Goal 1:** Strengthen the adult immunization infrastructure
2. **Goal 2:** Improve access to adult vaccines
3. **Goal 3:** Increase community demand for adult immunizations
4. **Goal 4:** Foster innovation in adult vaccine development and vaccination-related technologies

National Vaccine Advisory Committee

• June 4-5, 2019
  – Committee vote on NVP Development Subgroups Tasks 1-4
  – Vaccine Confidence Charge

• September 17-18, 2019
  – Committee vote on NVP Development Subgroups Tasks 5-6
  – Updates on Immunization Equity Charge
  – Influenza Vaccine Safety Monitoring Presentation +
Regional Stakeholder Engagement Meeting Series

Concluded series in August 2019
• Nearly 500 stakeholders, in all 10 HHS regions
• Discussed, strategized, and collaborated around adult immunization at the local, state and regional levels
• Final report will highlight activities poised for impact, such as
  – Reestablishing immunization coalitions in Illinois and Minnesota
  – Training stakeholders on how to use immunization registries to optimize HPV vaccination in New Jersey, New York, and New York City,
  – Developing and strengthening partnerships among state health departments and departments of corrections to enhance vaccination among correctional facility populations in Washington, Oregon, and Idaho
• We also gathered promising best practices through this initiative to share with stakeholders
