

Update on the National Vaccine Program

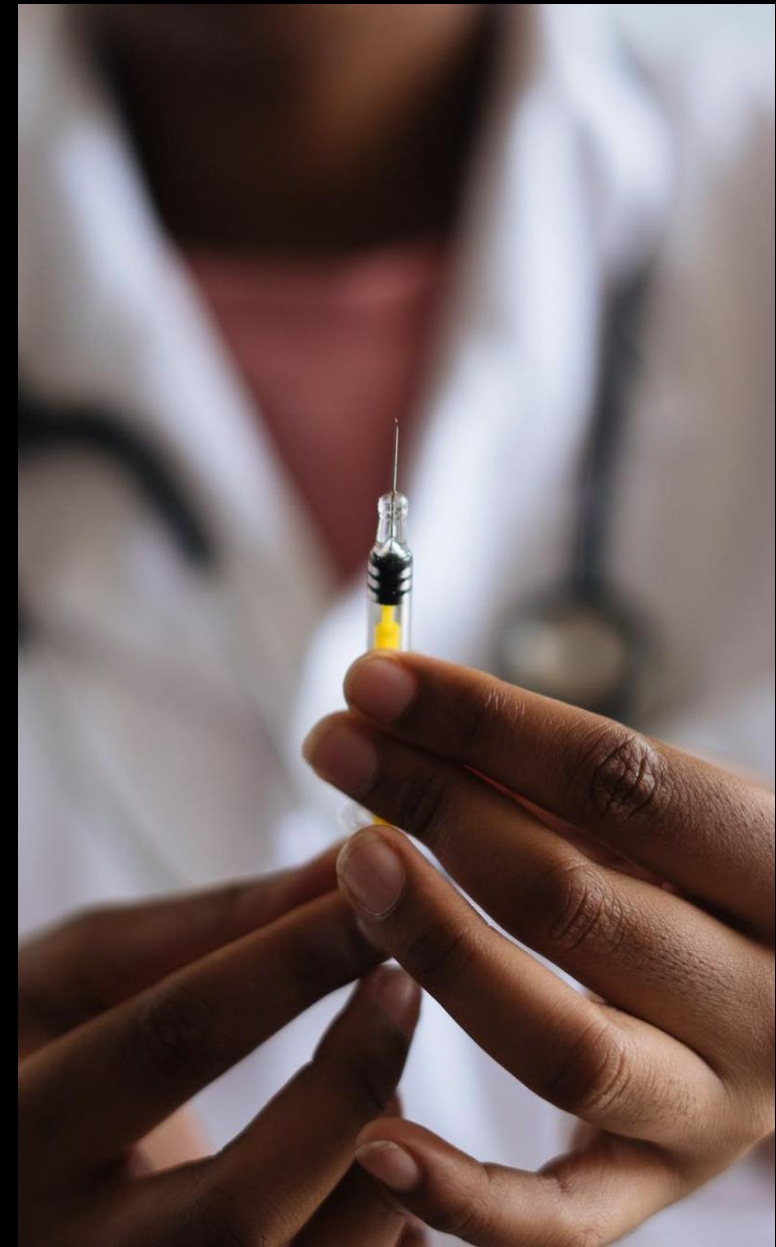

CDR VALERIE MARSHALL

OASH

Office of the
Assistant Secretary
for Health

The National Vaccine Program was established in 1986 to achieve optimal prevention of human infectious diseases through immunization and to achieve optimal prevention against adverse reactions to vaccines.

OASH

Office of the
Assistant Secretary
for Health

Priorities

Increase vaccine uptake

Focus on increasing vaccination rates, especially among high-risk populations

Improve vaccine education

Provide resources and public messaging to improve vaccine knowledge and address hesitancy

Improve access to vaccines

Reduce disparities and inequities in access to and use of routinely recommended vaccines across the lifespan

Initiatives

Vaccine Innovation

Evaluation of vaccination innovation priorities

Vaccine Safety

Provide direction to improve coordination and stakeholder input into the timely detection of vaccine safety signals

Vaccine Access

Increase access to and use of all routinely recommended vaccines

Vaccine Confidence

Efforts to build public trust in vaccination and address vaccine hesitancy.
