Ending the HIV Epidemic

HHS Has Launched A New Initiative to End the HIV Epidemic in America

**GOAL:**

- **Diagnose** all people with HIV as early as possible after infection.
- **Treat** the infection rapidly and effectively to achieve sustained viral suppression.
- **Prevent** people at risk for HIV using potent and proven prevention interventions, including PrEP, a medication that can prevent HIV infections.
- **Respond** rapidly to detect and respond to growing HIV clusters and prevent new HIV infections.
- **HIV Workforce** will establish local teams committed to the success of the Initiative in each jurisdiction.

**75% reduction in new HIV infections in 5 years and at least 90% reduction in 10 years.**
