

Notice Regarding Replacement National Drug Code Number for Cresemba®

On February 20, 2023, Astellas provided notification to its trading partners that the national drug code (NDC) number for Cresemba® (isavuconazonium sulfate) 372mg Vials was updated as follows:

Old NDC	Description	New NDC
00469-0420-99	Cresemba® 372MG VIAL	00469-0420-01

The new NDC does not represent any change in form, strength or product composition of Cresemba. The table above reflects the old and new NDCs for Cresemba 372mg Vials.

Please note that the new NDC is a replacement for the old NDC. For purposes of pricing and purchasing from Astellas through the 340B program, Astellas considers the new NDC as if it were the same as the old NDC.

340B Inventory Replenishment:

Because the new Cresemba NDC is, in fact, the same product (drug, dose, or formulation) with the same 340B price as the corresponding old NDC, Astellas will allow an eligible 340B covered entity utilizing a compliant 340B inventory replenishment model to count accumulations of the old NDC toward replenishment of equal quantities of the corresponding new NDC (see above table).

Any questions regarding this matter can be directed to dawn.powell@astellas.com
