Think about....

Emerging rural health issue(s)

Demonstrating impact of your program

Challenges and solutions in your communities

Successful partnerships and collaboration

Given your work, what do you see as the most pressing and/or emerging rural health issue(s)?

Question #2

What are the biggest challenges you have experienced addressing the rural health issues in your community and what solutions did you implement to address them?

Given the challenges with data in rural communities, how do use data to demonstrate the impact in your program?

What examples do you have for building successful partnerships and/collaboration in your communities?
